

**CHILLING HOURS DEFINED:** Chilling refers to the number of hours, 45 degrees F and under, during the dormancy period. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit. The amount varies with each variety and the hours need not be continuous. In the description of the fruit tree, 800 hours (for example) means it needs that many minimum hours of chilling time.

## FRUIT TREES

### APPLE

**ANNA APPLE** Remarkable fruit for mild-winter climates. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. 200 hours. Self-fruitful or pollinated by Dorsett Golden or Einshemer.

**ARKANSAS BLACK SPUR APPLE** Large, later season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. 800 hours. Partly self-fruitful.

**BRAEBURN APPLE** New from New Zealand. Superb late season fruit. Very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours (est.). Self-fruitful.

**FUJI APPLE** California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull, reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent Pollinizer for other apple varieties. Less than 500 hours. Self-fruitful.

**GALA APPLE** (original Gala) Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish over yellow. Early harvest. Good Pollinizer for other varieties. Adapted to cold and warm winter climates. Less than 500 hours. Self-fruitful.

**GOLDEN DELICIOUS APPLE** (Yellow Delicious) Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid-season harvest, Sept in Central Cal. 700 hours. Self-fruitful.

**GRANNY SMITH APPLE** Large, late, green, crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. 600 hours. Good Pollinizer for other apples. Self-fruitful.

**GRAVENSTEIN APPLE** (Red Gravenstein) Famous for sauce and baking, also used fresh. Crisp, juicy flavor, tart green with red stripes. Early bloom, early harvest. 700 hours. Pollen sterile. Pollinizer required – Empire, Fuji, Gala, Red Delicious.

**HONEYCRISP APPLE** Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Pollinated by Fuji, Gala, or Golden Delicious.

**PINK LADY APPLE** (Cripps Pink) New hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late Oct in Central Cal. Self-fruitful. 4-500 hours.

**RED DELICIOUS APPLE** (Bisbee spur) Sweet, crisp, flavorful - perhaps the best Red Delicious. Early fall harvest. Small, compact tree. Good Pollinizer for most other apples. 700 hours.

Pollinated by Gala Granny Smith, Golden Delicious, Fuji.

**RED FUJI APPLE** (BC#2) Redder-skinned sport of Fuji. Sweet, very crisp, and flavorful; excellent keeper. Ripe Sept-Oct in Central Cal. Excellent Pollinizer for other apples. Self-fruitful.

**YELLOW NEWTON PIPPIN APPLE** Yellow-green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest till cheeks are blushed yellowish green (late Oct./early Nov. in Central Cal). Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. 700 hours. Self-fruitful.

### APRICOT

**BLLENHEIM (ROYAL) APRICOT** All-purpose freestone, sweet, aromatic, flavorful. Long time #1 apricot in California. Early bloom. Late June harvest in Central Calif. 500 hours. Self-fruitful.

**CHINESE (Mormon) APRICOT** Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult, spring frost-prone climates. 700 hours. Self-fruitful.

**HARCOT APRICOT** From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central Cal. Sweet, juicy, rich flavor - one of the best. 700 hours. Self-fruitful.

**PUGET GOLD APRICOT** Proven producer of large, flavorful fruit in Western Wash. Recommended for climates where spring rains and frosts limit apricot culture. August harvest. 600 hours. Self-fruitful.

### CHERRY

**BING CHERRY** Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. 700 hours. Pollinated by Black Tartarian, Van, Rainier. Also Stella in colder climates.

**BLACK TARTARIAN CHERRY** Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollinizer required - interfruitful with all popular sweet cherries.

**CRAIG'S CRIMSON CHERRY** Taste test winner. Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. 800 hours.

**LAPINS CHERRY** Self-fruitful dark red sweet cherry. Large, firm, good flavor. Similar to Van in color, Bing in shape. Great pollinator for Bing. Sometimes sold as "Self-fruitful Bing." 800 hours.

**MONTMORENCY SOUR CHERRY** Large, light red skin with yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy and very heavy bearing. 700 hours. Self-fruitful.

**RAINIER SWEET CHERRY** Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. 700 hours. Pollinizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

**UTAH GIANT CHERRY** Best sweet cherry, according to Utah folks. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollinizer required. Bing, Lambert, Rainier, Van.

### FIG

**BLACK MISSION FIG** (AVAILABLE POTTED ONLY) The favorite. Purplish-black skin, strawberry colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Fresh/dry/can. 100 hours. Self-fruitful..

**IMPROVED BROWN TURKEY FIG** (AVAILABLE POTTED ONLY) Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted, coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful.

**VIOLETTE DE BORDEAUX FIG** (AVAILABLE POTTED ONLY) Small black fruit with dark red flesh. Rich flavor Fresh/dry/can. 100 hours. Self-fruitful..

### MULBERRY

**ILLINOIS Everbearing** Bears an abundance of sweet, dark, highly-flavored fruit, 1-1/2 inches long x 1/2 inch wide that look like elongated blackberries, and have a delicious and distinctive sweet taste. The berries start to ripen a little later than some other cultivars, and ripen continuously throughout July, August, and into September, hence the 'Everbearing' name. Self-fruitful.

**PAKISTAN** - large and long — up to 4 inches — and have a delicious, rich real raspberry flavor. Fast growing trees with large heart shaped leaves offer a dense cool shade. Fruit ripens mid to late May. Self-fruitful.

**PERSIAN** - The delicious purple black large juicy tart-sweet fruits are considered to be the best tasting of all mulberries. Fruit ripens in late summer over a long season. Self-fruitful.

### NECTARINE

**ARCTIC BLAZE WHITE NECTARINE** Taste test winner. Low acid white nectarine with rich flavor and firm texture. Large size, red and creamy white skin. Mid to late August harvest. 700-800 hours. Self-fruitful.

**ARCTIC GLO NECTARINE** Sprightly-sweet, early season white-fleshed nectarine. Nice balance of sugar and acid, very appealing flavor. Highly recommended for home orchards. Late June/early July in Central Cal. 6-700 hours. Self-fruitful.

**ARCTIC JAY NECTARINE** Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of acid and sugar. Self-fruitful. 500 hours.

**ARCTIC ROSE NECTARINE** Delicious, super-sweet, white nectarine. Rich flavor and nice crunchy texture when firm, extremely sweet when soft. 600-700 hours. Self-fruitful.

**ARCTIC SPRITE MINIATURE NECTARINE** White-fleshed miniature nectarine. Tangy-sweet fruit ripens late midSeason, 4-6ft. Chill hours 450. Self-Fruitful

**DOUBLE DELIGHT NECTARINE** Sensational fruit - consistently the best flavored yellow nectarine - plus magnificent, double pink flowers. Dark red-skinned freestone fruit is sweet with unusually rich flavor. Very high scoring in taste-tests. Heavy-bearing tree. Harvest in July in Central Cal. 400-500 hours. Self-fruitful.

**GOLDMINE NECTARINE** Long-time favorite in California. Small to medium size white-fleshed freestone. Aromatic, juicy, sweet. Ripe in August. 400 hours. Self-fruitful.

**HEAVENLY WHITE NECTARINE** Very large, firm, white-fleshed freestone. Superb acid- sugar balance, and rich, complex flavor — connoisseur's delight. Dull red and cream-colored skin. Mid-July in Central Cal. 650 hours. Self-fruitful.

**NECTAR BABE MINIATURE NECTARINE** Excellent quality fruit: mid-season yellow freestone with sweet, rich, delicious flavor. Heavy bearing 5-6 ft. tree. 400-500 hours. Self-fruitful.

**HARKO NECTARINE** Sweet, firm, yellow semi-freestone. Cold hardy with showy, large, single pink blossoms. Ripens with Redhaven Peach in early July. Tolerant of bacterial spot and brown rot. 800 hours. Self-fruitful.

### OLIVE Available potted only

**ARBEQUINA OLIVE** Excellent clonal selection of Arbequina showing higher olive production and oil yields. Oil is sweet, delicate and fragrant with intense fruitiness but low levels of bitterness and spiciness. Self-fertile

**ARBOSANA OLIVE** The dwarf Arbosana tree produces large crops of small olives with high concentrations of premium olive oil. The Arbosana flavor is a complex mixture of fruitiness with a good balance of pungency and bitterness. The late-bearing Arbosana variety is fairly cold hardy though not as hardy as Arbequina. self-fertile, but produces higher yields when paired with a pollinizer such as Arbequina.

**FRANTOIO** Most commonly the main component for a Tuscan style oil. Consistently produces a high yield, very fruity oil. The medium size fruit ripens on the late side. A self-compatible tree, but will benefit greatly from other pollinators.

**KORONEIKI** High oil content, medium vigor, small fruit. Self-fruitful.

**MANZANILLO OLIVE** Classic table olive. Large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollinizer.

**MISSION OLIVE** The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollinizer.

**PENDOLINO** This slow growing tree has a beautiful weeping habit and grows to about 20' tall over time. Recommended for warmer climates. Variety is widely appreciated by growers for its high fruit production and is an excellent pollinator, both for table and oil cultivars.

### PEACH

**ARCTIC SUPREME WHITE PEACH** Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Cal. 700 hours. Self-fruitful.

**BABCOCK PEACH** Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. Ripens mid-July in Central Cal. Widely adapted. 250-300 hours. Self-fruitful.

**ELBERTA PEACH** Famous yellow freestone. Classic, rich, peach flavor: high scoring in taste tests. Use fresh, canned, cooked. Ripe late July/early Aug in Central Cal, up to 3-4 weeks later in colder climates. 800 hours. Self-fruitful.

**EL DORADO MINIATURE PEACH** Very high quality, richly-flavored fruit. Yellow freestone, attractive red-blushed skin. Harvest early to mid -June. 4-5 ft. tree. 500 hours. Self-fruitful.

**HONEY BABE MINIATURE PEACH** Sweet, yellow freestone with rich flavor. Heaving bearing tree reaching 5 feet. Excellent choice for home orchards. 500 hours. Self-fruitful.

**INDIAN BLOOD CLING PEACH** Large, late season canning peach. Red skin, red flesh, rich flavor. Blooms late, sets heavy crops. Self-Fruitful. 800 hours.

**INDIAN FREE PEACH** Taste test winner at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinate.

**KAWEAH PEACH** High yield, large fruit, delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. 500 hours. Mid-late season. Self-fruitful.

**OCTOBERFEST PEACH** Medium to large semi-clingstone late season fruit will hang on tree for over a month and still be good. Sweet, firm yellow flesh.

**O'HENRY PEACH** Popular fresh market yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-Aug in Central Cal. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

**Q-1-8 PEACH** White-fleshed, semi-freestone fruit is sweet and juicy. **Peach leaf curl resistant** with showy blossoms. 700-800 hours. Self-fruitful.

**SUNCREST PEACH** A favorite fresh-market variety. Large, very firm, fine-flavored, yellow freestone. Bright red skin over yellow.

Harvest late July in Central Cal. Frost hardy blossoms, consistent producer. 700 hours. Self-fruitful.

### PEAR

**BARTLETT PEAR** World's most popular pear. Early mid-season, about August 1<sup>st</sup>. High quality, tolerates hot summers. 800 hours. Self-fruitful in most climates of the western U.S. Elsewhere pollinated by Bosc, D'Anjou, Winter Nelis.

**COMICE PEAR** The gift pack pear. Sweet, aromatic, fine texture, superb flavor & quality - one of the best. Short neck, greenish-yellow skin with red blush. Mid-Sept harvest. 600 hours. Self-fruitful in most of western U.S., or plant with Bartlett.

**D'ANJOU PEAR** Large, short-necked, firm, good quality, keeps well. Harvest September 1<sup>st</sup>, one month after the Bartlett in Central Cal. 800 hours. Pollinated by Bartlett.

**SECKEL PEAR** Connoisseurs' favorite. Sweet, flavorful, spicy, aromatic, perhaps the best. Russeted brown skin. Resists fireblight. 500 hours. Full crop 800 hours. Self-fruitful in arid West.

**WARREN PEAR** Excellent quality dessert pear and highly resistant to fire blight. Med. to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Harvest mid-August. Cold hardy to -20 deg. 600 hours. Self-fruitful.

### ASIAN PEAR

**20TH CENTURY ASIAN PEAR** (Nijisseiki, apple pear) Juicy, sweet, mild-flavored fruit is crisp like an apple. Early to mid- Aug harvest in Central Cal. Keeps well. Easy to grow, heavy bearing small tree. 450 hours. Self-fruitful, or pollinated by Shinseiki, Bartlett, or other.

**HOSUI ASIAN PEAR** Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-Aug in Central Cal. 450 hours. Pollinated by Shinko, Chojuro, Bartlett, or 20th Century.

**SHINSEIKI ASIAN PEAR** Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early Aug in Central Cal. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 350-450 hours. Self-fruitful.

### PERSIMMON

**CHOCOLATE** Brown flesh when ripe. Very sweet.

**COFFEECAKE** Apple type, firm when ripe. Slightly spicy flavor

**FUYU 'JIRO'** Apple type, firm when ripe

**FUYU GIANT** Apple type, firm when ripe

**HACHIYA** Soft when ripe, astringent when firm. Great for drying.,

### PLUERRY

**Sweet Treat Pluerry** - Cross of a plum and a cherry, combining the sweetness of a cherry with that summer fresh plum zing. Much larger than a cherry, this precocious and prolific variety will hang on the tree for over a month, pollenized by Santa rosa plum or Flavor King Pluot. 300 Chill hours.

### PLUM & PRUNES

**BURGUNDY PLUM** Maroon-colored skin and flesh. Sweet with little or no tartness and a very pleasing, mild flavor. High taste test scores. harvest mid-July to mid-Aug in Central Cal. Very productive. Narrow, upright habit. 400 hours. Self-fruitful.

**ELEPHANT HEART** Large, baseball size fruit. Fruit is juicy and flavorful – excellent for eating fresh or canning. 400 hours. Self-fruitful.

**FRENCH IMPROVED PRUNE** California's commercial prune. Reddish-purple skin, dark amber flesh. Very sweet, high quality fruit. Dessert/canned/dry. 800 hours. Self-fruitful.

**LATE SANTA ROSA PLUM** Medium to large reddish-purple skin, amber flesh. Tart-sweet with rich flavor when fully ripe. Ripe about one month after Santa Rosa. 500 hours. Self-fruitful.

**SANTA ROSA PLUM** Most popular plum in California. Juicy, tangy, flavorful. Reddish-purple skin, amber flesh tinged red. Late June in Central Cal. 300 hours. Self-fruitful.

**SATSUMA PLUM** Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollinated by Santa Rosa or Beauty.

**WEeping SANTA ROSA SEMI DWARF PLUM** One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit - long limbs bow gracefully to ground. Easily espaliered. 400 hours. Self-fruitful.

### PLUOT

**PLUOT® DAPPLE DANDY** Dependable setter and taste test winner, great plum-apricot flavor. Ripe skin is maroon w/ yellow dapple. August harvest in Central Calif. 400-500 hours. Pollinated by Flavor Supreme pluot, Santa Rosa or Burgundy plum.

**PLUOT® FLAVOR KING** Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central Calif. Naturally small tree. 400-500 hours. Pollinated by Flavor Supreme, Santa Rosa, or Late Santa Rosa.

**PLUOT® FLAVOR QUEEN** Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, orange flesh. Prolonged harvest: mid-July thru August. 4-500 hours. Pollinated by early blooming Pluot or Burgundy Plum.

**PLUOT® FLAVOR SUPREME** Taste test winner. Plum-apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central Cal, about 2 weeks before Santa Rosa. 700-800 hours. Pollinated by Santa Rosa, Late Santa Rosa, or other Pluot.

**PLUOT FLAVOR FINALE** Medium- to large-sized Pluot® with purplish-red skin and jelly-like amber-red flesh. Wonderful complex flavor. Pollinate by Santa Rosa plum, 500 hours.

**POMEGRANATE** Available potted only

**AC SWEET POMEGRANATE** Flavor is sweet and refreshing, seeds are soft and edible. Ripe fruit can hang for weeks without splitting. Very hardy plant will take temperatures to below zero. One of Utah's favored varieties. Required chill hours 100-200. Self-fruitful.

**CRANBERRY POMEGRANATE** Medium sized fruit, cranberry red exterior. Light to deep red arils, small seed. Mild acidity, flavor rated as very good. 150 hours. Self-fruitful.

**WONDERFUL POMEGRANATE** Large, purple-red fruit with a delicious, tangy flavor. Best quality in hot inland climate. Bright red-orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

### MULTI-BUDDED FRUIT TREES

Multi-budded fruit trees are those with multiple varieties grafted onto a single tree. They work well in small spaces or if you want many varieties of a specific fruit without the maintenance of multiple trees. All multi-budded trees have varieties that will pollinate each other. We offer the following trees:

**APPLE 4-N-1**

**APPLE 6-N-1 ESPALIER**

**CHERRY 4-N-1**

**PEAR 6-N-1 ESPALIER**

**PLUOT 4-N-1**

## NUTS

### ALMOND

**GARDEN PRINCE GENETIC DWARF ALMOND** Compact, lushly foliated 10-12ft. tree. Soft shell, kernels especially sweet and tasty. Bears young and heavy. Large, light pink blossoms. 250 hours. Self-fruitful.

**ALL\_IN\_ONE Almond** ( potted only) Small size tree ( 15') is self fruitful, cold hardy .

### CHESTNUT

**COLOSSAL CHESTNUT** Thought to be a hybrid of the Asian and European chestnuts. High quality medium to large sized nuts fall easily from the hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollinated by Colossal or Nevada seedling.

**NEVADA CHESTNUT** Pollinizer for the Colossal - also a good producer. One Nevada pollinates 8-10 Colossal trees. Not tolerant of alkaline soil. 500 hours. Pollinated by Colossal.

### PECAN

**MAHAN PECAN** Largest pecan. Old variety, late maturity. Good in desert climates. 250 hours. Self fruitful.

**TEJAS PECAN** Medium sized, heavy bearing. 250 hours. Self fruitful.

### PISTACHIO

**KERMAN FEMALE PISTACHIO** Long hot summers required to ripen. Do not disturb root ball when handling and planting. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollinated by Peters.

**PETERS MALE PISTACHIO** Pollinizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females (Kerman). Do not disturb root ball when handling and planting. Drought-resistant once established. 800 hours.

### WALNUT

*All Walnuts are on No. Calif. Black Walnut root stock*

**CARMELO WALNUT** Late leafing and blooming, adapted to colder climate than Hartley or other popular English walnuts. Very large, well filled nut. 700 hours. Self-fruitful.

**CHANDLER WALNUT** Developed by UC Davis. Heavy bearing, high quality light-colored nuts. Good choice for backyard tree. Fall harvest. 700 hours. Self-fruitful.

**HARTLEY WALNUT** Long-time no. 1 walnut in California for its quality and dependability. Large, thin-shelled, well-sealed nut. Light colored flavorful kernel. 700 hours. Self-fruitful.

### KIWI

**JENNY KIWI** Only Self fertile, hardy Kiwi. *Potted Only*

**VINCENT FEMALE** Fuzzy skinned fruit needs a male to pollinate.

### GRAPES

WINE AVAILABLE POTTED ONLY

**CABERNET SAUVIGNON** Late season red wine grape, small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful.

**CONCORD SEEDLESS (BAREROOT)** – Same taste but smaller than Concord, no seeds.

**ZINFANDEL GRAPE** For fruity red wines. Medium size, round, juicy, reddish-black berry, early mid-season. Prefers mild winters, cool summer. Heavy bearing. 100 hours. Self-fruitful.

TABLE AVAILABLE POTTED ONLY

**BLACK MONUKKA SEEDLESS GRAPE** Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful.

**BLUEBERRY GRAPE**

**PRINCESS GRAPE** Large white, mid-season.

**RUBY SEEDLESS GRAPE** Sweet, dark red fruit. 100 hours. Self-fruitful.

**SUFFOLK RED SEEDLESS GRAPE** Large clusters, slightly spicy flavor. 100 hours. Self-fruitful

### BERRIES

BLUEBERRIES AVAILABLE POTTED ONLY

**BLUECROP BLUEBERRY** No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, flavorful fruit doesn't drop or crack. Tolerates hot summers if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**BLUERAY BLUBERRY** Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. Blueberry culture requires soil that is moist, acidic, and high in humus. 800 hours. Self-fruitful. Ripens early to mid-season.

**ELLIOT BLUEBERRY** Heaviest bearing variety, and latest to ripen. Medium size berries, slightly tart, will not crack or drop. Upright, vigorous bush. Tolerate hot summer if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**EMERALD BLUEBERRY** Produces abundant clusters of large to very large berries with tasty, balanced sweet flavor. Very productive and highly rated. Southern Highbush. 250 hours, Self fruitful.

**JEWEL BLUEBERRY** Midseason harvest of large to very large berries with tangy sweet flavor. Chill requirement estimated at 200 hours. Self-fruitful.

**JUBILEE BLUEBERRY** Midseason. Jubilee bushes are upright and quite compact, with fruit borne on the outer periphery of the bush. 500-700 hours.

**O'NEAL BLUEBERRY** Southern Highbush (low chill requirement, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant 2 varieties for biggest crops.

**SHARPBLUE BLUEBERRY** Southern highbush. Excellent flavor. Nearly evergreen in mild winter climates. Bears fruit nearly year-round. Vigorous plant to 6 ft. Dime-sized dark blue fruit. 200 hours.

## BLACKBERRIES (AVAILABLE POTTED ONLY)

**BLACK SATIN** (Thornless) Large fruit with very good flavor. Sweet, high quality, and firm. Will not soften, leak, or lose color in hot weather. Late season producer with a very long production season.

**CHESTER (thornless)**(BAREROOT) Fruit firm , not tart. Productive, late season.

**MARION** Medium to large. Fruit is bright red, firm, very flavorful. Produced on vigorous, trailing canes. Suitable for home freezing and canning. Leading variety in Pacific Northwest. Ripens mid-July to mid-August.

## BOYSENBERRIES

**BOYSENBERRY** (Thornless) (AVAILABLE POTTED ONLY) Medium reddish-black berry. A less vigorous grower with lower fruit yields compared to Regular Boysenberry. Good for mild winter areas. Popular with home owners because its thornless. Ripens in June.

## CURRANTS

**CRANDALL** – Black. Self Fruitful

**RED Cherry** – Red. Self Fruitful

**WHITE CHERRY** – White self Fruitful

## ELDERBERRY

**NOVA** – Commercial type with large berries and clusters. Self-fruitful but sets better with another type nearby.

**YORK** – medium to large dark soft fruit. Needs pollinator like Nova.

## RASPBERRIES AVAILABLE POTTED ONLY)

**BABA RED RASPBERRY** (The well-known ever-bearing "Bababerry." Large red berries up to 1", highly regarded for flavor. Much more tolerant of summer heat than other raspberries. Plentiful June harvest followed by smaller crop in fall.

**CAROLINE RASPBERRY** Large berry with intense raspberry flavor.

**FALL GOLD RASPBERRY** This ever-bearing variety is sweet and large with golden yellow color. It is a winter hardy selection that harvests in July through the summer months.

## SMALL VEGGIES

**Rhubarb - Victoria Red**

**Asparagus – Martha Washington**
