2010 Bareroot

Planting Instructions:

Dig a hole as deep as the rootball and at least 2-3 times the width.

Use 1/3 organic soil amendment mixed with 2/3 existing soil to backfill around plant. (*please do not use potting soil*) We recommend DE

Starter Fertilizer for all new plantings. All plants should be set a little above the existing grade, plant high. The top roots should be planted just under the soil surface.

Water as needed to establish. Check daily and individually, not all plants have identical water needs. Remember, moist not muddy!

Plant Warranty

*Bareroot that fails to leaf out must be returned by June 1, 2010 with cash register receipt.

*We do not warranty plants that suffer from dehydration or drowning.
*All authorized returns are for store credit only, no cash refunds.

no credit card refunds

Thank You

Balled & Burlap

Planting Instructions:

Dig a hole as deep as the rootball and at least 2-3 times the width.

Use 1/3 organic soil amendment mixed with 2/3 existing soil to backfill around plant. (*please do not use potting soil*) We recommend Sure Start fertilizer for all new

plantings. **DO NOT REMOVE BURLAP!** Untie from around trunk of plant, fold burlap back into the hole. The top of rootball should be planted 1"-2" above ground level.

Water as needed to establish.

Check daily and individually, not all plants have identical water needs. Remember, moist not muddy!

Wide and shallow holes

Plant Warranty

*Deciduous B&B that fails to leaf out must be returned by May 1, 2006 with cash register receipt.

*We do not warranty plants that suffer from dehydration or drowning.
*All authorized returns are for store credit only, no cash refunds.
